no arrests were made. The PDoP was informed of this case in Sep 07, who subsequently notified the Deputy of Police Affairs at the Ministry of Interior (MOI). The victim appears to have been released from the hospital in May 2009, when members of the P-PiTT observed him at the Mosul MTU. He apparently was released from the MTU and his location is currently unknown.

2nd May 2009

2/1 CAV unit conducting inspection of Riyadh Iraqi Police station discovered multiple detainees who appeared to have been abused by Iraqi Police personnel. The detainees had severe brusies to lower extremities from beatings and were in need of medical attention. Some detainees were handcuffed in offices, others beaten and confined to locked rooms and left in a dyhydrated state with no fluids provided. The unit also discovered the suspected instruments used to conduct the abuse in the office of the Iraqi Police Station Chief. These suspected tools of torture had “blood marks” and were retained by the unit. The unit contacted local Iraqi Police authorities who responded and provided necessary medical attention. When the Riyadh Iraqi Police Chief was confronted about the suspected detainee abuse at his station he responded he was aware of the beatings and supported it as a method of conducting investigations. The unit continues to engage the local Iraqi authorities and provide assistance as necessary.
