and Amol— for their unfailing emotional support during the writing, and because I seek in them that attitude towards life which Dr Kalam admired, and wanted this work to reflect.

Arun Tiwari

This book is being released at a time when India’s technological endeavours, to assert its sovereignty and strengthen its security, are questioned by many in the world. Historical y, people have always fought among themselves on one issue or another. Prehistorical y, battles were fought over food and shelter. With the passage of time, wars were waged over religious and ideological beliefs; and now the dominant struggle of sophisticated warfare is for economic and technological supremacy. Consequently, economic and technological supremacy is equated with political power and world control.
