WINGS OF FIRE ORIENTATION - 1

earnestly hope and pray that the development resulting from these two plans—Self Reliance Mission and Technology Vision – 2020—wil eventual y make our country strong and prosperous and take our rightful place among the ranks of the “developed” nations.

***

Epilogue

This book is interwoven with my deep involvement with India’s first Satel ite Launch Vehicle SLV-3 and Agni Programmes, an involvement which eventual y led to my participation in the recent important national event related to the nuclear tests in May, 1998. I have had the great opportunity and honour of working with three scientific establishments— Space, Defence Research and Atomic Energy. I found, while working in these establishments, that the best of human beings and the best of innovative minds were available in plenty. One feature common to al three establishments, is that the scientists and technologists were never afraid of failures during their missions. Failures
