subject in science had no attraction for want of experiments, whereas it ought to have been a deeply interesting study. It was one of the compulsory subjects in India and so I had selected it for the London Matriculation. This time, however, I chose Heat and Light instead of Chemistry. It was said to be easy and I found it to be so.

With my preparation for another trial, I made an effort to simplify my life still further. I felt that my way of living did not yet befit the modest means of my family. The thought of my struggling brother, who nobly responded to my regular calls for monetary help, deeply pained me. I saw that most of those who were spending from eight to fifteen pounds monthly had the advantage of scholarships. I had before me examples of much simpler living. I came across a fair number of poor students living more humbly than I. One of them was staying in the slums in a room at two shillings a week and living on two pence worth of cocoa and bread per meal from Lockhart's cheap Cocoa Rooms. It was far from me to think of emulating him, but I felt I could surely have one room instead of two and cook some of my meals at home. That would be a saving of four to five pounds each month. I also came across books on simple living. I gave up the suite of rooms and rented one instead, invested in a stove, and began cooking my breakfast at home. The process scarcely took me more than twenty minutes, for there was only oatmeal porridge to cook and water to boil for cocoa. I had lunch out and for dinner bread and cocoa at home. Thus I managed to live on a shilling and three pence a day. This was also a period of intensive
