17 *Experiments in Dietetics*

As I searched myself deeper, the necessity for changes both internal and external began to grow on me. As soon as, or even before, I made alterations in my expenses and my way of living, I began to make changes in my diet. I saw that the writers on vegetarianism had examined the question very minutely, attacking it in its religious, scientific, practical and medical aspects. Ethically they had arrived at the conclusion that man's supremacy over the lower animals meant not that the former should prey upon the latter, but that the higher should protect the lower, and that there should be mutual aid between the two as between man and man. They had also brought out the truth that man eats not for enjoyment but to live. And some of them accordingly suggested and effected in their lives abstention not only from flesh-meat but from eggs and milk. Scientifically some had concluded that man's physical structure showed that he was not meant to be a cooking but a frugivorous animal, that he could take only his mother's milk and, as soon as he had teeth, should begin to take solid foods. Medically they had suggested the rejection of all spices and condiments. According to the practical and economic argument they had demonstrated that a vegetarian diet was the least expensive. All these considerations had their effect on me, and I came across vegetarians of all these types in vegetarian restaurants. There was a Vegetarian Society in England with a weekly journal of its own. I subscribed to the weekly, joined the Society and very shortly found myself on the Executive Committee. Here I came in contact with those who
