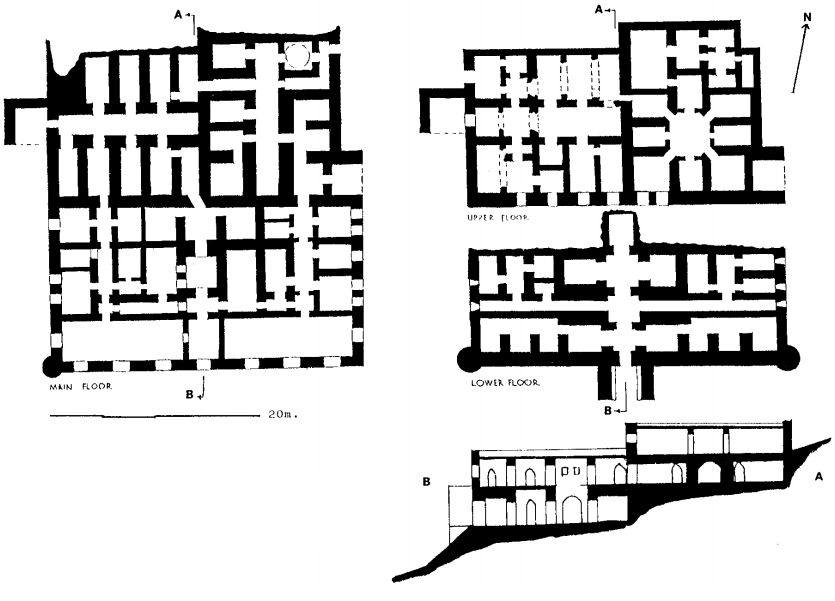

Figure 3.24 *Sarkhushak, Building A, plans and elevations. From Baker and Allchin 1996: fig. 5.13.*

The Shansabani occupation of sites throughout the Bamiyan region can be understood at least partially in relation to this branch of the Shansabanis' continued monitoring of access to the core valleys. Moreover, their probable reuse of westward hilltop sites can also be explained by the contiguity of Ghur to the west, and the traffic between the two regions.
