Sabuktigin through that of Khusrau Malik, there are no known *jitals* attributable to Mu'izz al-Din from these mints (the farthest western ones being from Taliqan and Kurraman) (map, p. xv). Although, there were rare copper issues, which however diverged considerably from the *jital* type: cf. R. and M. Tye 1995: 41–49, 54 and, e.g., Nos. 83, 85, 87, 88, 89e1, 90, 95, 98, 101, 104, 105e1, 106, 107e1, 108, 112, 115, 190, 191.

51. Cf. Schlumberger 1952: 258–267; Schlumberger 1978: 38–41, 61–64 (my trans.); Appendix II, Afghanistan VIII: 3.
52. It is noteworthy that at Zaranj, Mu'izz al-Din would have witnessed the special status accorded to intellectual dignitaries, who were in fact courted to lengthen their stays by the Maliks of Sistan, in part to expound on points of religio-juridical import before an assembly. Such was the case with Juzjani's own grandfather Minhaj al-Din 'Uthman, as well as Ahwad al-Din Bukhari. See Juzjani vol. I, 1963: 277–278, 396 (trans. vol. I, 1881: 189–191, 447); Bosworth 1994: 398–399.
53. Among Mu'izz al-Din's other possible adoptions from his Ghaznavid precursors might have been his "collecti[on of] a corps of expensively trained slaves to make his writ run and his treasures and territories safe from clannish co-sharers" (Habib 1992: 7). From among the thousands of *bandagan-i Turk* Mu'izz al-Din likely purchased, he had select favorites – e.g., Taj al-Din Yildiz, Nasir al-Din Qabacha, Qutb al-Din Aibek, Baha' al-Din Tughril – all of whom he came to regard as his own children. Cf. also Chapter 2, and Volume II.
54. In his analysis of the military advantages possessed by nomadic groups, Irons (2003) employed the concept of "cultural capital" to encapsulate the modes of organization and skills that developed as a result of specific activities (e.g., livestock raiding). In describing the Mongols, Burbank and Cooper (2010: 4) observed their possession of "the technological advantages of nomadic societies – above all, a mobile, largely self-sufficient, and hardy military – [and] capacious notions of an imperial society …" (cf. also Chapters 1, and 6). These studies are also extremely useful in pointing to the possible *conceptual* advantages emerging even from varying degrees of nomadic pastoralism. See also Barfield 1993: 144; Thomas 2018: 25–26.
