59. 'Since 1945 the term "collaborators" has acquired a distinctive and pejorative moral connotation. But wartime divisions and affiliations often carried local implications altogether more complicated and ambiguous than the simple post-war attributions – of "collaboration" and "resistance" would imply… In France and Belgium, and also in Norway, resistance against the Germans was real… But not until the very end of occupation did the number of active resisters exceed the numbers of those who collaborated with the Nazis out of belief, venality or self-interest.' 68. Norman Davies says: 'On the ideological front, Westerners are accustomed to thinking of the Second World War as a two-sided conflict, of good fighting evil. The Soviets had a similar dialectical view. They were the authors of the concept of anti-Fascism, which caught on in the West, encouraging the illusion that all opponents of Fascism were inspired by similar values. In reality, Soviet communism was every bit as hostile to Western democracy as it was Fascism…' From *Europe*
