

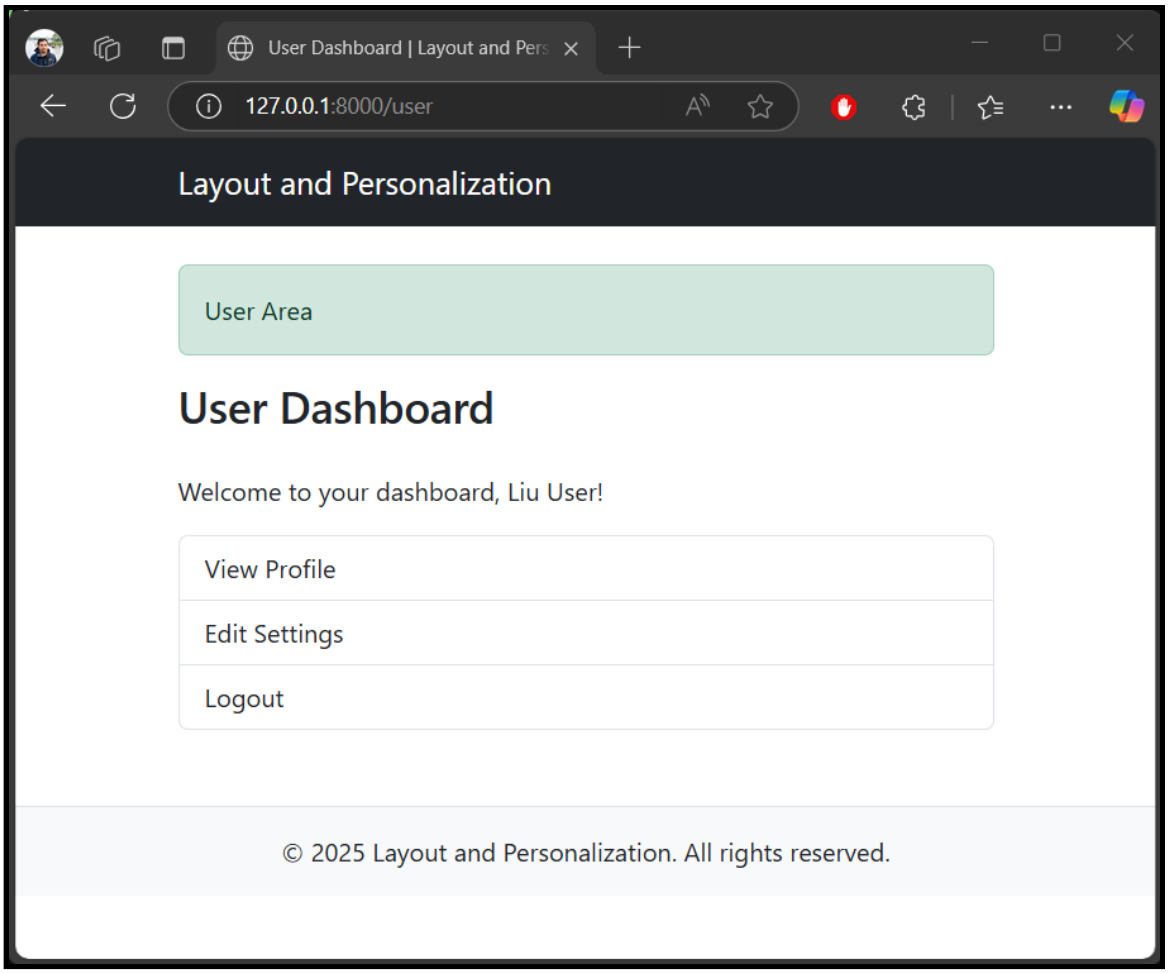

Figure 6.4: User Dashboard

6.13.5 Summary

In this lab, you:

- Created a shared Blade layout using Bootstrap for styling.
- Used `@extends`, `@section`, and `@yield` to manage layout content.
- Personalised the view based on user role with role-specific alerts and menus.
- Improved UI design using Bootstrap components like navbar, alerts, and list groups.

You now have a clean and reusable layout system for your Laravel app that supports both visual consistency and content personalization.

6.14 Exercise 13: Using Partial Views in Laravel 12
