

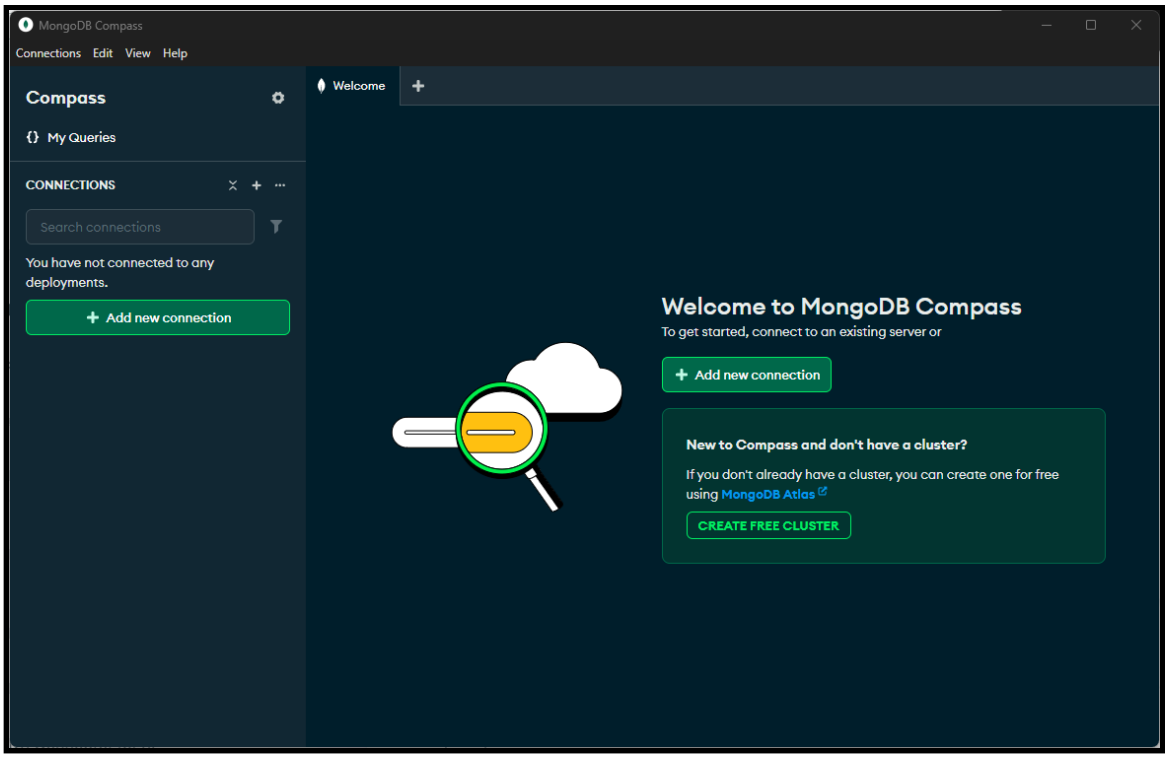

Figure 12.1: MongoDB Compass.

If you want to create additional users, you can connect to the MongoDB instance and configure them as follows:

1. Open MongoDB Compass and connect to your MongoDB instance using the connection string `mongodb://admin:pass12345@localhost:27017/admin`.

2. Click `Create database` in tab to create a new database and collection.

    - Database name: `productdb`
    - Collection name: `products`
