Appendix A: PHP Cheat Sheet

This cheat sheet provides a quick reference to the most commonly used PHP syntax and functions. It is designed for beginners and intermediate developers who want to refresh their knowledge or learn new concepts.

1. Basic Syntax

```php
<?php
echo "Hello, World!";
?>
```

2. Variables and Data Types

```php
$name = "Agus";         // String
$age = 25;              // Integer
$price = 12.5;          // Float
$is_active = true;      // Boolean
```

3. Control Structures

- If / Else

```php
if ($age >= 18) {
    echo "Adult";
} else {
    echo "Minor";
}
```

- Switch

```php
$day = "Monday";
switch ($day) {
    case "Monday":
        echo "Start of week";
        break;
    default:
        echo "Other day";
}
```

- For Loop

```php
for ($i = 0; $i < 5; $i++) {
    echo $i;
```
