8. Forms and $_POST

```
// HTML
<form method="post">
    <input name="name" />
    <input type="submit" />
</form>

// PHP
if ($_SERVER["REQUEST_METHOD"] == "POST") {
    echo $_POST['name'];
}
```

9. Include and Require

```
include 'header.php';
require 'config.php';
```

10. Sessions

```
session_start();
$_SESSION["user"] = "Agus";
echo $_SESSION["user"];
```

11. Cookies

```
setcookie("user", "Agus", time() + 3600);
echo $_COOKIE["user"];
```

12. MySQLi (MySQL)

```
$conn = new mysqli("localhost", "user", "pass", "db");
$sql = "SELECT * FROM users";
$result = $conn->query($sql);
while ($row = $result->fetch_assoc()) {
    echo $row['name'];
}
$conn->close();
```

13. Error Handling

```
try {
    throw new Exception("Error occurred");
} catch (Exception $e) {
    echo "Caught: " . $e->getMessage();
}
```

14. Sanitize Input
