*85. In her article on the subject, Jennifer Siegel explains that in these early days of the revolution (1918–1919), there was limited intelligence coming out of Russia and that which the British were receiving was often unreliable or contradictory. In such circumstances it was difficult to make informed judgement on the situation in Russia. Siegel, ‘British Intelligence on the Russian Revolution and Civil War – A Breach at the Source’, Intelligence and National Security , Vol. 10 (1995), pp. 468–85 (hereafter ‘Breach’). Not until the 1920s would better intelligence become available.*

*87. Other forms of information on Bolshevism in these early months after the October revolution included Bolshevik public statements and newspapers, the reports of various Allied subjects returning to their countries, accounts of Russian émigrés fleeing the Communists and intercepted Bolshevik wireless communications. Siegel, ‘Breach’, p. 470. Indeed, in these early years of the Russian revolution, the Soviet government proved very inept at protecting their communications. In 1920 the Commissar for Foreign Affairs, Georgii Chicherin sent cipher keys by post to his deputy, Maxim Litvinov, in Copenhagen. He then wired to let Litvinov know of the letter and how to retrieve the keys which were written*
