```
$twig = new \Twig\Environment($loader);
// $postData as before

print $twig->render('auto-filter.html.twig', [
    'postData' => $postData
]);
```

... and put the following into a `views/auto-filter.html.twig` template:

```
{# views/auto-filter.html.twig #}
<!DOCTYPE html>
<html>
<head>
    <title>{{ postData.title }}</title>
</head>
<body>
  <h1>{{ postData.name }}</h1>
  <p>Age: {{ postData.age }}</p>
  <p>Occupation: {{ postData.occupation }}</p>
</body>
</html>
```

Now when we request the page, we see this...

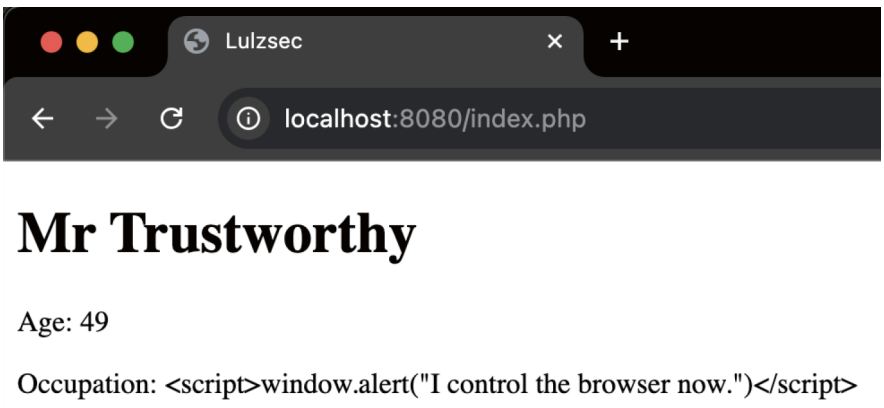

Figure 11-5. *Slightly safer...*
