Arrow Functions 150
Testing for Existing Functions 152
Namespaced Functions 154
Calling Functions from Namespaces 155
Qualified Namespace Function Calls 156
Using Namespaces 157
Namespaces Are Not Scope 158
Functional Programming 159
First-Class and Higher-Order Functions 160
Pure Functions 160
Summary 161

Chapter 4: Logic and Control 163

What Is Truth? 164
Control Structures 164
Decision-Making 165
Repetition 169
Nesting, break, continue 172
Miscellaneous 174
Functions 176
empty( ) Is a Problem 177
Logical Expressions 178
Comparison Operators 178
Logical Operators 179
Short-Circuiting 180
Precedence and Associativity 181
Ternary Expressions 183
Null-Coalesce 184
Null-Safe 185
Bitwise Operations 186
Errors and Exceptions 187
Error Levels 188
