```
    //        // Some custom task logic

    // })->everyThirtyMinutes();

}
```

---

In the above, the **logs:clear** command is scheduled to run daily at midnight. You can define your own commands or closures as needed. The Scheduler provides many fluent methods like and custom CRON expressions using **cron('expression')** to allow complete flexibility.

Creating Custom Artisan Command

*Generating Command*

The Laravel Scheduler can run any Artisan command and so we start to create a custom Artisan command that clears old logs as below:

---

```
php artisan make:command ClearLogs
```
