```
        // Resize the image to a maximum width of 800px while maintaining aspect ratio,

        // you can add constraints to avoid upsizing smaller images.

        $image->resize(800, null, function ($constraint) {

            $constraint->aspectRatio();

            $constraint->upsize();

        });

        // Optionally, adjust the image quality (e.g., 75% quality for optimization)

        $quality = 75;

        // Save the processed image to the local media disk we configured earlier

        // The disk 'media' is assumed to be configured to
```
