```
            File::makeDirectory($reportDir, 0755, true);

        }

        $filename = 'report_' . now()->format('Ymd_His') . '.txt';

        $reportPath = $reportDir . '/' . $filename;

        // Write the report to a file

        File::put($reportPath, $reportContent);

        $this->info("Report generated successfully: {$reportPath}");

        return 0;

    }

}
```

In the above example, the command:
