It must be that the hand
Has a will to grow larger on the wall,
To grow larger and heavier than
the wall . …[82]

Davis's autobiography highlights intertextual acts of reading and writing as ways to engage physical and social walls and to create connections between prisons and the larger society. Toppled walls often become central structures of justice realized. When recalling the preparation of *If They Come in the Morning*, Davis writes, "From the inception of the idea, we saw the book as an instrument through which people could deepen their knowledge of repression. … People … could learn what was really happening behind the walls in general."[83] As she marks the process of using writing to forge connections, she also recalls painful bouts of "profound sadness." Davis describes using the acts of reading and writing letters to fellow prisoners to salvage her focus and maintain it during her eighteen-month imprisonment: "My very existence, it seemed, was dependent on my ability to reach out to them. I decided … I would use my life to uphold the cause of my sisters and brothers behind walls."[84] Davis maps movement building through discourse and conveys a sense of solidarity that transcends the space and time of imprisonment.

This form of connection sets up her final chapter, "Bridges," which she opens with the epigraph "Walls turned sideways are bridges." For Davis, this epigraph serves as a mantra, a statement that also makes clear a transcendence envisioned as a literary transformation and a strategic vision. This section marks the culmination of her narrative and effectively repurposes walls as a form of transformative architecture. In this chapter she recalls the defense-team strategy and multiracial and transnational solidarity campaigns that contributed to her acquittal, as Davis suggests. Just as she displaces the Berlin Wall in the earlier section, in this chapter she re-envisions the prison wall. This displacement is emphasized on the final page of the chapter, where she uses a metaphor of deconstruction to explain the circumstances of what is next for her and the movement. Rather than ramparts or barricades appearing, pathways open in Davis's formulations: "Work. Struggle. Confrontation lay before us like a rock strewn road. We would walk it."[85] The path resembles debris from a tumbled wall, and Davis writes as if the limits of her incarceration have yielded a new outlet for an activism built through networks of solidarity over and through walls.
