conducted covert missions abroad yielded legislation aiming for redress and transparency.

Similarly, the Black Power movement was at a crossroads. Jeffrey Ogbar writes of the "radical spirit of black nationalism" that had started to transform national consciousness about issues of social justice and power. This led to a spike in the election of black government officials, the sprouting of black studies and ethnic studies departments at universities and colleges, and cultural and commercial appeal for Black Power's messaging. Ogbar also details the "daunting and complex web of government repression [that] undermined radical black organizations."[88] The extent to which the government surveyed and curtailed such activist circles they deemed "radical" through COINTELPRO counterintelligence measures is still being discovered by contemporary historians today.[89]

Davis remained in the public eye after her trial, and her autobiography extended the widespread knowledge of her case. Several books about her trial were released before or around the time of her own autobiography, including Regina Nadelson's *Who Is Angela Davis? The Biography of a Revolutionary* (1972), J. A. Parker's *Angela Davis: The Making of a Revolutionary* (1973), and Marc Olden's *Angela Davis* (1973). A former member of the jury at Davis's trial, Mary Timothy, published *Jury Woman* (1974), and Davis's friend and member of her solidarity committee, Bettina Aptheker, detailed courtroom proceedings in *The Morning Breaks: The Trial of Angela Davis* (1975).[90]

Davis's book was widely reviewed, sometimes multiple times by the same national publications. Many reviewers made reference to Davis's development within the black freedom struggle and her global pathways. An anonymous reviewer for *Publishers Weekly* wrote, "Angela Davis' life is a uniquely American odyssey."[91] Reviewers noted the artful rendering of her prose but took up the nature of her autobiographical intervention. The question of the genre of political autobiography drew scrutiny from several reviewers. Christopher Lehmann-Haupt wrote in the *New York Times*, "The autobiography seems to be direct, simple, and relatively personal in style. So presumably we are afforded a glimpse at the author's character. … As it turns out on closer reading, however, her character isn't especially conducive to the autobiographical mode. As it turns out, she is successful in not 'individualizing' herself."[92] Others echo the travails to her travel, often mentioning of her time in Germany. Gwendolyn Osborne, writing for the
