Iscador is working or the tumor is not malignant! I feel relieved, vindicated, and hopeful."[7] Lorde faced a terminal outlook and daily challenges to her health but continued to surpass personal and professional aims for her visit. In the company of Schultz, Joseph, and other friends, Lorde found places to thrive: flower markets, dinner parties, and lesbian nightclubs such as Die Zwei and Pour Elle. By June 16, as the summer solstice approached and sunsets in Berlin extended deep into the evening, she wrote in her journal that dancing was a source of catharsis and joy.[8] This journey to Berlin also fueled the expansion of a broader diasporic consciousness specifically honed in Germany. Lorde was prolific in the divided city, despite her fragile health, fears of mortality, and distance from home. She routinely documented both her struggles and triumphs: "Sitting here in this lovely green park in Berlin," Lorde wrote in her journal, while sitting in Thiel Park, "I feel I still have enough moxie to do it all, on whatever terms I'm dealt, timely or not. Enough moxie to chew the whole world up and spit it out in bite sized-pieces."[9] Lorde expanded her diasporic consciousness with teaching and writing poetry as her most powerful tools of navigation and survival.
