legacies of division.[45] The layout includes several key images printed in two-page spreads with two-inch white borders reserved for captions. These include the opening Berlin Wall image and the Baltimore portrait of Dr. King. Other images are printed in close juxtaposition on pages in which groupings convey particular messages of tension or coalition, in turn aggregating Freed's visions and conveying his mapping strategies. In the final pages Freed includes an excerpt of King's speech from the March on Washington. This citation was planned before King's death, but in the printed book it appears elegiac. Freed was in Israel when King was assassinated. His brother wrote him a letter the following day telling him about the public outcry and rage in Brooklyn: "If I were a young black, I'd be with them—bitter as hell. The whites may have lost more in King than the blacks."[46] Just as King's speech and Freed's images of the march drew on the symbolic power of the Lincoln Memorial and the National Mall, Freed's placement of King's words on the concluding pages of this important photographic collection imbues a sense of melancholy within his urgent political treatment of America's racial struggles.

In April 1969 the *New York Times Book Review* published a review of *Black in White America* alongside a write-up of Eldridge Cleaver's *Post-Prison Writings*. In the review Mel Watkins imagines Freed's photographic perspective as connected to his geographic mobility. Under the headline "Diversity of His Experience" and next to a sampling of Freed's photographs from the project, Watkins writes, "The black man's experience in the United States has been shaped by … racial prejudice—he has been a prisoner of his own blackness. … [Freed's photobook's] panoramic view begins with the roots of repression in rural, Jim Crow America and moves as the black man himself has moved, to our large urban ghettos. Within its sweep, the grief, joy and rage of black America are abundantly illustrated."[47] The panoramic impulse that Watkins refers to here speaks to Freed's frequent use of blown-up snapshots printed across two-page spreads as well as the geographic and topical sweep of the collection. This review, and others published later in the *New York Times* and the *Chicago Tribune*, posits the collection as an illustration of racial division inscribed into America's built social landscapes and ghettos—and Freed as the traveling photographer who encountered them. These reports also highlight Freed as a border crosser several times over, whose critical contribution to photography was his ability to identify with and literally move closer to his subjects. His own experience and
