Jews which is ideological in focus and takes the form of anti-Zionism. Pierre-André Taguieff, *La Nouvelle Judéophobie* (Paris: Mille et une nuits, 2002), 25.

2. According to the Commission nationale consultative des droits de l'homme, in 2000 there were 743 antisemitic acts committed in France. After dropping in 2001, this number then rose to 932 in 2002 and has stayed high during the decade since. Michel Wieviorka, *La Tentation Antisemite: Haine des Juifs dans la France d'aujourd'hui* (Paris: Editions Robert Laffont, 2005), 31. According to the Kantor Center of Tel Aviv University, in 2012, France had by far the most antisemitic incidents in the world, more than double the number of any other country, http://kantorcenter.tau.ac.il/sites/default/files/doch-all-final-2012.pdf.

3. *Communautarisme* in French implies the voluntary idenfication by members of minority groups with other members of their group. The English "communitarianism," which normally denotes a school of thought that seeks to balance individual rights with responsibility to the community, is thus not quite accurate but I have used it for convenience. Another way of translating the word would be "identitarianism."

4. In *L'Identité malheureuse* (Paris: Editions Stock, 2013), Alain Finkielkraut argues in favor of banning the veil and links this argument both to a defense of French national identity and to the struggle against antisemitism.

5. Ramadan's article, "Critique des (nouveaux) intellectuels communautaires," was refused by France's major newspapers and published instead on the website oumma.com on 3 Oct. 2003. My translation. Further references appear in the text.

Ivan Segré, "The Philo-Semitic Reaction: The Treason of the Intellectuals," in Alain Badiou, Eric Hazan, and Ivan Segré, *Reflections on Anti-Semitism*, translated by David Fernbach (London: Verso, 2013), 46; originally published as *La Réaction philosémite ou la trahison des clercs* (Paris: Nouvelles Editions Lignes, 2009).

7. "[T]his ideological current is *reactionary* rather than communitarian" (Segré, "Philo-Semitic Reaciton," 46, italics in original).

8. Bruno Chaouat offers a trenchant critique of Badiou in "Antisemitism Redux: On Literary and Theoretical Perversions," in *Resurgent Antisemitism in Global Perspectives*, edited by Alvin Rosenfeld (Bloomington, Ind.: Indiana University Press, 2013), 125–27.

9. Alain Badiou, "Préface," in Ivan Segré, *Qu'appelle-t-on penser Auschwitz?* (Paris: Nouvelles Editions Lignes, 2009), 10. My translation.

10. "Denouncing the 'wave of anti-Semitism' was a good way to distract attention from the bloody Operation Rempart," Alain Badiou and Eric Hazan, "'Anti-Semitism Everywhere' in France Today," in *Reflections on Anti-Semitism*, 4; originally published as Alain Badiou and Eric Hazan, *L'antisemitisme partout: Aujourd'hui en France* (Paris: La Fabrique, 2011).

11. Badiou and Hazan ask if those who denounce antisemitism "are fully aware of being, for their part, a specialist detachment of intellectuals in the service of the present forms of reactionary domination, under the protection of the US army and with the state of Israel as the advance post in the face of barbarism," "Anti-Semitism Everywhere," 23.
