fact that the Jews fight against the Catholic Church, they are free thinkers, and constitute the vanguard of atheism, Bolshevism and revolution. The Jewish influence upon morals is fatal, and the publishers spread pornographic literature. It is also true that the Jews are committing frauds, practicing usury, and dealing in white slavery. It is true that in the schools, the Jewish youth is having an evil influence, from an ethical and religious point of view, upon the Catholic youth."

16. Not surprisingly, few quote Karski's evaluation of antisemitism in Polish society under German occupation as contained in a 1940 report to General Władysław Sikorski: "The solution of the Jewish Question by the Germans. . .is a. . .quite dangerous tool in the hands of the Germans, leading toward the 'moral pacification' of broad sections of the Polish society. . . . [A]lthough the nation loathes them mortally, this question is creating something akin to a narrow bridge upon which the Germans and a large portion of Polish society are finding agreement. The present situation is creating a twofold schism among the inhabitants of these territories—first, a schism between Jews and Poles in the struggle against the common enemy, and second, a schism among the Poles, with one group despising and resenting the Germans' barbaric methods [conscious of the danger in this], and the other, regarding them [and thus the Germans too!] with curiosity and often fascination, and condemning the first group for its indifference toward such an important question."
