ADVANCE PRAISE FOR

Asia's New Geopolitics

"What emerges from these well-crafted and incisive essays is a much better understanding of competitions critical to preserving peace and promoting prosperity. Michael Auslin identifies the critical factors that will determine whether the future for free and open societies across the Indo-Pacific region remains bright or a darker future emerges in which autocratic and closed systems are ascendant. All who have a stake in that future should read and discuss *Asia's New Geopolitics*."

—H. R. McMaster, former US national security adviser
and author of *Battlegrounds*

"Michael Auslin is one of America's sharpest analysts of Asia's geopolitics. This collection brims with insights about the future of the world's most important region."

—Hal Brands, coauthor of
The Lessons of Tragedy: Statecraft and World Order

"An extremely engaging and timely discussion of the US strategy in the Indo-Pacific in the midst of China's growing influence and the diminishing US presence in the region. With insightful analysis of the challenges faced by the United States, Auslin reminds us why we cannot remain a spectator to the reshaping of regional order. A must-read for anyone, let alone experts and policy makers, who is concerned about the future role of the United States in the region."

—Gi-Wook Shin, the William J. Perry Professor of Contemporary Korea
and director of the Shorenstein Asia-Pacific Research Center
at Stanford University

"A work about the geopolitics and policies of Asia written with the depth of a true historian, Auslin's *Asia's New Geopolitics* offers a set of insightful essays about some of the key challenges in this part of the world over the next generation. I found the work engaging as an expert in the field, but also, as a professor, I found it to be an excellent teaching text for my students."

—Victor Cha, vice dean and D.S. Song-KF Professor of Government,
School of Foreign Service, Georgetown University,
and former senior director for Asia, National Security Council
