understand that good handwriting is a necessary part of education. I am now of opinion that children should first be taught the art of drawing before learning how to write. Let the child learn his letters by observation as he does different objects, such as flowers, birds, etc., and let him learn handwriting only after he has learnt to draw objects. He will then write a beautifully formed hand.

Two more reminiscences of my school days are worth recording. I had lost one year because of my marriage, and the teacher wanted me to make good the loss by skipping a class – a privilege usually allowed to industrious boys. I therefore had only six months in the third standard and was promoted to the fourth after the examinations which are followed by the summer vacation. English became the medium of instruction in most subjects from the fourth standard. I found myself completely at sea. Geometry was a new subject in which I was not particularly strong, and the English medium made it still more difficult for me. The teacher taught the subject very well, but I could not follow him. Often I would lose heart and think of going back to the third standard, feeling that the packing of two years' studies into a single year was too ambitious. But this would discredit not only me, but also the teacher; because, counting on my industry, he had recommended my promotion. So the fear of the double discredit kept me at my post. When however, with much effort I reached the thirteenth proposition of Euclid, the utter simplicity of the subject was suddenly revealed to me. A subject which only required a pure and simple use of one's reasoning powers could
