Integer

Integers hold only whole numbers including positive and negative numbers, i.e., numbers without fractional part or **decimal point**. They can be decimal (base 10), octal (base 8) or hexadecimal (base 16). The default base is decimal (base 10). The octal integers can be declared with leading 0 and the hexadecimal can be declared with leading 0x. The range of integers must lie between -2^31 to 2^31.

Keyword

Decimal Point- A point or dot used to separate the whole number part from the fractional part of a number.

Example:

```
<?php

// decimal base integers
$deci1 = 50;
$deci2 = 654;

// octal base integers
$octal1 = 07;

// hexadecimal base integers
$octal = 0x45;

$sum = $deci1 + $deci2;
echo $sum;

?>
```

Output:

704

Double

Can hold numbers containing fractional or decimal part including positive and negative numbers. By default, the variables add a minimum number of decimal places.
