```
$lang1=”JavaScript”;

$lang2=”PHP”;

$lang=$lang1.” & “.$lang2;

echo $lang;

$out.=”are programming languages”;

echo $out;

?>
```

Output:

JavaScript & PHP

```
<!DOCTYPE HTML>
<html>
    <head>
        <title>Example</title>
    </head>
    <body>

        <?php
            echo “Hi, I’m a PHP script!”;
        ?>
    </body>
</html>
```

2.2.4 Bitwise Operators

Unlike to the other types of PHP operators, Bitwise operators examine and manipulate integer values in the level of individual
