1 N.M. = 1 Nuclear Magneton = $5{\cdot}505 \times 10^{-24}$ Gauss × cm³.

1 B.M. = 1 Bohr Magneton = $9{\cdot}27 \times 10^{-24}$ Gauss × cm³ = $1{\cdot}8365$ N.M.

m_e = Mass of Electron.

Note.—The unit of field intensity, the Gauss, is sometimes called the Oersted.
