Classes and Interfaces 643
Inheritance and Interface Implementation 644
Traits 646
Association 646
Aggregation 648
Composition 648
Using Classes 649
The SOLID Principles 650
Single Responsibility Principle (SRP) 650
Open-Closed Principle (OCP) 652
Liskov Substitution Principle (LSP) 655
Interface Segregation Principle (ISP) 658
Dependency Inversion Principle (DIP) 660
In Conclusion 663
Design Patterns 663
Creational Patterns 664
Structural Patterns 667
Behavioral Patterns 671
Summary 674

Chapter 11: Programming for the Internet 677

Hypertext Transfer Protocol (HTTP) 678
URLs 680
HTTP(S) Requests 681
Request Methods 683
Idempotence 687
Resource Paths and Routing 688
Request Headers 693
Cookies 696
Query String Data 700
Request (Body) Data 702
Uploading Complex (and Binary) Data 707
