```
Output:
Array
(
    [a] => Alice
    [b] => Bob
    [r] => Russell
)
```

Preserving Keys

Remember that `sort()` reindexed the sorted array with numeric keys, even if the array was associative? If that causes problems for you, then `asort()` (and `arsort()`) will sort by value but preserve keys.

```
$words = ['foo', 'Bar', 'BAR', 'Foo'];
$assoc = ['foo' => 'foo', 'bar' => 'bar'];

asort($words);
asort($assoc);

print_r($words);
print_r($assoc);

Output:
Array
(
    [2] => BAR
    [1] => Bar
    [3] => Foo
    [0] => foo
)
Array
(
    [bar] => bar
    [foo] => foo
)
```
