Table 11-32. *Twig logical operators*

`and`	`true` if both operands are true
`or`	`true` if at least one operand is true
`xor`	`true` if only one operand is true
`not`	Negates an expression
`()`	Groups an expression

`b-and`
`b-or`
`b-xor`
	Bitwise AND, OR, and XOR

Comparison

Comparison operations are where things start to get abstract. The usual shorthand characters are present, but some operations use a syntax formed from full words:

Table 11-33. *Twig comparison operators*

`==`	Equals
`!=`	Does not equal
`<`	Less than
`<=`	Less than or equal
`>`	Greater than
`>=`	Greater than or equal
`<=>`	PHP “spaceship” operator - returns -1, 0 or 1 when comparing operands
`same as`	Equivalent to PHP `===`
