Hypertext markup language (HTML) (*cont.*)
standards, 747, 748
status code groups, 722
templating, 802, 805
versions, 776
XPath, 760, 761 (*see also* XPath)
Hypertext preprocessor (PHP)
accessing environment data, 52
accessing files, 53–56
built-in mathematics functions, 371
coding standards, 43–45
command line arguments, 49–51
configuration
directives, 30
directive syntax, 31, 32
overriding ini settings, 33, 34
ini files, 30
logging errors, 30
modes, 31
module (extension), 34, 35
system search paths, 32, 33
enforcing standards, 45
ini directives, 708
installation
Apt, 3–5
DNF, 5–8
extensions, 11, 12
Homebrew, 8–10
package management system, 3
Windows, 10
interpreter, 1, 42
markup safety functions, 842
misc filesystem functions, 55, 56
opening tags, 804
output buffer, 48, 49
outputting data, 47, 48
output mechanisms, 47
problem, 805, 806
read functions, 54
remote files and streams, 56–61
removing tags, 843, 845
shell command, 1
SimpleXML module, 706
socket-level HTTP requests, 695
solution, 806
structure and syntax
embedded, 36–38
expressions, 40
header statements, 40
line of code, 40
operations, 40
pure files, 38, 39
rules, 39
source code files, 35, 36
tokens, 42
UTF-8, 430, 432–434
web SAPI, 677
wrapper I/O streams, 59
write functions, 55
Hypertext transfer protocol (HTTP)
complex and binary data, 707–715
cookies, 696–700
idempotence, 687, 688
using library, 727–729
lower-level (network) protocol, 679
output buffering, 725–727
query string data, 700–702
request (body) data, 702–707
request headers, 693–696
request message, 679, 681–683
request method, 683–687
resource paths and routing, 688–693
response headers, 724, 725
response message, 679
response page, 685
