Precision filtering, 768
preg_filter(), 584–586
preg_grep(), 581
preg_last_error(), 589
preg_last_error_message(), 589
preg_match(), 581–583
preg_match_all(), 581–583
preg_quote(), 584
preg_replace(), 586, 588
preg_replace_callback(), 586, 588
preg_replace_callback_array(), 586, 588
preg_split(), 588
Primitive types, 74
printf(), 498, 499
Private constructors, 308–311
Problem domain, 641
Procedures, 99
Property hooks, 296, 297, 317, 318
Prosigns, 422
Protocols, 679
    specification, 686
Pseudorandom, 399
Pseudo-types, 109
PSR, *see* PHP Standards Recommendations (PSR)
PSR-1 standard, 44, 159
PSR-4 standard, 343
PSR-12 standard, 45, 166, 342, 364
PST, *see* Pacific Standard Time (PST)
Pure functions, 160

Q

Quantifiers, 565, 566
querySelector(), 785–787
querySelectorAll(), 785, 787
Query strings, 681, 700–702, 720
Quicksort algorithm, 270, 273
Quoted strings, 412
quotemeta(), 518

R

Rainbow tables, 541
Random number generation (RNG), 399
Random numbers, 398–400
RDBMS, *see* Relational database management system (RDBMS)
Reason phrase, 721
recursive_array_count(), 282
Recursive functions, 280–282
Redhat-based systems, 5
Reference vs. value, 107–109
Referencing, 93–95
Reflection methods, 360–364
Reflective programming, 360
Regular expression, 430
    alternatives, 567, 568
    assertions, 561–563
    back-references, 572, 573
    character classes, 566, 567
    character types, 561
    conditional sub-patterns, 577–579
    defined, 552
    delimiters, 553
    escape sequences, 557
    finding longest, 599
    ignore empty, 599, 600
    lookahead and lookbehind assertions, 575–577
    mbstring functions, 592
    metacharacters, 564
    modifiers, 554–557
    multi-byte functions, 590–598
    non-printing characters, 557–559
    notation system, 552
