Kiran developed a personal style of writing. She wrote all day long, and for as many days as the thoughts flowed. Once they stopped, she would travel (mostly to various prisons) in order to break the mental stagnation and return to writing when her mind became fresh again. Her trips helped her compare the conditions and happenings in Tihar and with those in other prisons. In this context, she notes:

> My book travelled with me in a way. It strengthened my resolve to say it all, for it was bound to be of help. Prisons, I felt, were in need of new ideas and attitudes. The visits educated me that what needed to be 'corrected' most of all was the mindset of the prison policy makers and prison managers, and what we had collectively attempted inside Tihar, with some degree of success. It was my belief that this book would also be a salute to this collective effort of prison staff, prisoners and the supporting community from outside. I thought we could offer a correctional model which had worked! The book called it the '3 Cs Model', i.e.,

The book (entitled *It's Always Possible*) is divided into three parts. corrective, collective and community-based. The first part is an authoritative documentation of 'what existed', and opens with her taking charge at Tihar Jail. The chapter entitled 'Do You Pray?' narrates her first day's experiences inside the prison. It's a moving account of a woman police officer who is, at the core, a rehabilitator, a crime preventer and a reformer, and who seeks to establish a strong bond of communication between her and the inmates in her very first meeting with them. After this opening account, she takes the reader on a journey into the depths of the prison. She describes everything in detail – be it the living conditions, health hazards, debauchery with respect to adolescents and children, harassing of women, dominance by gangsters, the cancer of corruption, drug addiction, lack of medical facilities and the insecure staff (who faced danger constantly). This portion of the book is interspersed with sketches of the state of affairs as it existed and seen by an inmate.

The second part of the book focuses on what was done with what existed. The inspiring material here illustrates how a prison was transformed into an ashram and highlights the restorative process of prison management. It emphasizes the concerted and collective effort of the prison staff, the prisoners and the community to achieve something substantial. No wonder Kiran called it a '3 Cs Model'. In the narrative, Kiran has most modestly chosen to place herself in the background and has given all the credit to the prison staff for their acceptance of the changes and their abilities to implement new policies and guidelines with enthusiasm, diligence and sincerity. Kiran has expressed her deep gratitude towards many individuals, institutions and organized members of the outside community for all their contributions, which made a noticeable difference. The text vividly explains the manner in which most of the inmates became responsible individuals within the prison walls, conducting themselves in an exemplary manner. They performed all positive activities for themselves in an organized way, realizing their benefit for one and all, not only for the present but also for the future.

The concluding part of the book is titled 'Emergence'. Here, Kiran presents relevant graphs and charts, which provide a summary of the emergence of Tihar from darkness into light. This part also visually depicts how Tihar gave up a vulture culture and adopted the '3 Cs Model', which has been designed as a 'noble ship' in which all sailed together in harmony and contentment. All these developments lent credibility to the book title: *It's Always Possible*.

His Holiness the Dalai Lama wrote the Foreword of the book. It was released at an impressive function in Delhi by Natwar Singh (the former minister for external affairs) on 25 September 1998,
