```
class ImportantEventNotification extends Notification
{
    use Queueable;
    protected $eventMessage;
    protected $eventDetails;
    /**
     * Create a new notification instance.
     *
     * @param string $eventMessage
     * @param array $eventDetails
     * @return void
     */
```
