```
class NewChatMessage implements ShouldBroadcast
{
    use InteractsWithSockets, SerializesModels;

    public $message;
    public $sender;
    /**
     * Create a new event instance.
     *
     * @param string $message
     * @param string $sender
     * @return void
     */
```
