```
    public function handle()
    {
        // Simulate a heavy processing task
        sleep(10); // Simulates a delay of 10 seconds
        \Log::info('ProcessHeavyTask executed successfully.');
    }
}
```

Dispatch Job

In one of your controller methods (for instance, in dispatch this job to the queue:

```
namespace App\Http\Controllers;
```
