closure-based tasks to the Scheduler in **Kernel.php** as below:

```
protected function schedule(Schedule $schedule)
{
    // Clear logs every day at midnight
    $schedule->command('logs:clear')->daily();
    // Generate a summary report every Monday at 8 AM
    $schedule->command('reports:generate')->weeklyOn(1, '8:00');
    // Execute a custom closure every thirty minutes
    $schedule->call(function () {
        // Custom task logic here
    })->everyThirtyMinutes();
}
```
