```
            'Content-Type' => Storage::disk('media')->mimeType($filename),

            'Cache-Control' => 'max-age=86400, public', // Cache file for 1 day

        ];

        // Stream the file using Laravel's response()->file() method

        return response()->file($path, $headers);

    }

}
```

Defining Streaming Route

In your **routes/web.php** file, add a route for file streaming:
