```
    // Optionally, customize headers for downloads

    $headers = [

        'Content-Type' => Storage::disk('media')->mimeType($filename),

        'Cache-Control' => 'max-age=86400, public', // Cache for efficient repeat downloads

    ];

    // Use response()->download() to force the download.

    return response()->download($path, $filename, $headers);

}
```

Defining Download Route

For this, create the route for file downloads in
