First, create a file called

---

nano archive_images.sh

In the editor, simply input the following script:

```
#!/bin/bash

# Define the source and target directories.

SOURCE_DIR="storage/app/media"

BACKUP_DIR="storage/app/backup/images"

TIMESTAMP=$(date +"%Y%m%d_%H%M%S")

ARCHIVE_FILE="$BACKUP_DIR/images_backup_$TIMESTAMP.tar.gz"
```
