API logic distinct from your web controllers, ensuring clean and focused code.

Adding Custom JSON Response Logic

Now here, open the newly created **ProductApiController.php** file and define the **index** method. Here, we will construct a JSON response that adheres to your desired structure as shown below:

```
namespace App\Http\Controllers\Api;

use App\Http\Controllers\Controller;

use Illuminate\Http\Request;

class ProductApiController extends Controller

{

    /**

     * Return a structured JSON response for products.
```
