```
        @case('inactive')
            <p>Status: Inactive</p>
            @break

        @default
            <p>Status: Unknown</p>
    @endswitch
</body>
</html>
```

6.12.4.6 Step 6: Run the Laravel App

Start the development server:

```
php artisan serve
```

Access the app at:

```
http://127.0.0.1:8000/logic
```

You should see a page demonstrating different Blade control structures in action.
