10.7.4.9 Testing the Application

After completing all the steps, we can now test the application. Run the following command to start the Laravel development server:

```
php artisan serve
```

Visit:

```
http://127.0.0.1:8000/users
```

or

```
http://127.0.0.1:8000/posts
```

Test Features:

- Click **Users** to view the list of users and their profiles

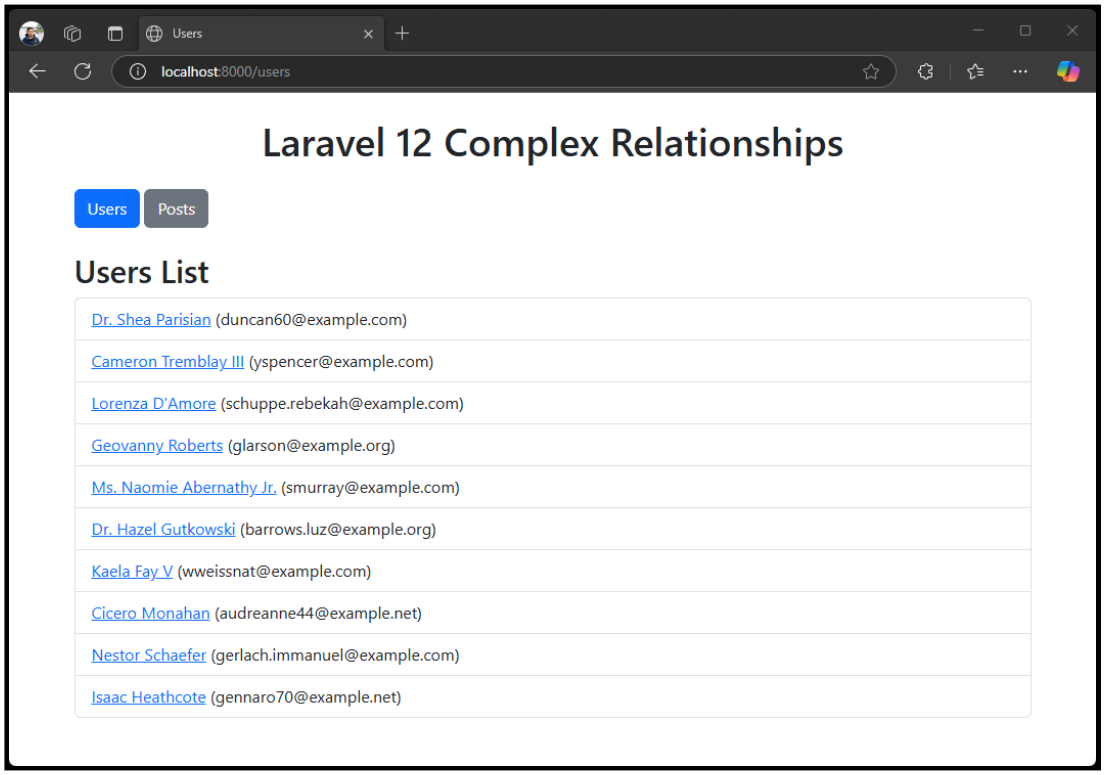

Figure 10.9: Users list.

- Click on a user to view their profile and posts
