missile. The RATO project was abandoned because the aircraft for which it was designed became obsolete. The new aircraft did not need RATO. With the project cal ed off, Narayanan was DRDO’s logical choice to lead the team for making the missile. Unlike us at ISRO, they preferred the philosophy of one-toone substitution rather than technology development and performance upgrading. The Surface-to-Air Missile SA–2 of Russian origin was chosen to acquire detailed knowledge of al the design parameters of a proven missile and to establish, thereby, the necessary infrastructure required in the organization. It was thought that once one-to-one indigenization was established, further advances in the sophisticated field of guided missiles would be a natural fal -out. The project was sanctioned in February 1972 with the code name Devil and funding of about Rs. 5 crore was made available for the first three years. Almost half of it was to go in foreign exchange. By now promoted to Air Commodore, Narayanan took over as Director, DRDL. He mobilized this young laboratory located in the southeastern suburbs of Hyderabad to take up this enormous task. The landscape dotted with tombs and old buildings started reverberating with new life.
