observed that people look for those characteristics in their work that relate to the values and goals which they consider important as giving meaning to their lives. If a job meets the employees'need
for
achievement,
recognition,
responsibility, growth and advancement, they wil work hard to achieve goals.

Once the work is satisfying, a person then looks at the environment and circumstances in the workplace. He observes the policies of the administration, qualities of his leader, security, status and working conditions. Then, he correlates these factors to the inter-personal relations he has with his peers and examines his personal life in the light of these factors. It is the agglomerate of al these aspects that decides the degree and quality of a person's effort and performance.

The matrix organization evolved in 1983 proved excel ent in meeting al these requirements. So, while retaining this structure of the laboratory, we undertook a task-design exercise. The scientists working in technology
