feeds but half a man’s hunger,”—those who cannot work with their hearts achieve but a hol ow, half-hearted success that breeds bitterness al around. If you are a writer who would secretly prefer to be a lawyer or a doctor, your written words wil feed but half the hunger of your readers; if you are a teacher who would rather be a businessman, your instructions wil meet but half the need for knowledge of your students; if you are a scientist who hates science, your performance wil satisfy but half the needs of your mission. The personal unhappiness and failure to achieve results that comes from being a round peg in a square hole is not, by any means, new. But there are exceptions to this like Prof. Oda and Sudhakar, who bring to their work a personal touch of magic based upon their individual character, personality, inner motives, and perhaps the dreams crystal ized within their hearts. They become so emotional y involved with their work that any dilution of the success of their effort fil s them with grief.

Prof. Oda was an X-ray payload scientist from the Institute of Space and Aeronautical Sciences (ISAS), Japan. I remember him as a diminutive man with a towering personality and eyes that radiated intel igence. His
