```php
namespace App\Console;

class Kernel extends ConsoleKernel
{
  protected function schedule(Schedule $schedule): void
  {
    if (app()->isProduction()) {
      $schedule->job(SendPayoutsJob::class)->monthly();

      $schedule->command('backup:run')->daily();
    }

    $schedule->job(CleanUpExpiredTransactionReportsJob::class)->daily();

    $schedule->command('activitylog:clean')->daily();
  }
}
```
